

Senior Maintenance Engineer (w/m/d)

für den Standort Regensburg, Deutschland

Would you like to make a valuable contribution to the health of patients? And do something really meaningful on your own responsibility? Then we look forward to hearing from you! Excellence beyond manufacturing - that's what we stand for as Aenova, one of the world's leading contract manufacturers and developers for the pharmaceutical industry with 4,000 employees at 15 sites. Our site in Regensburg is a competence center for high potent solids, e.g. cancer medicines.

Your key responsibilities

- You support our production site in Regensburg with a future-oriented maintenance strategy based on key figures and lean methods
- You develop a dedicated service team; close and cooperative collaboration, especially with the technical departments in the plant other internal interfaces and suppliers are important to you
- You manage cross-functional projects with a high level of commitment and vision
- You are happy to contribute to the further development of the procurement strategy and are the contact person for maintenance contracts
- Responsibility for the building infrastructure of our plants
- You will drive forward the introduction and further development of technical risk management
- You provide impetus for the continuous further development of processes, machines and systems and introduce process and production standards
- You take responsibility for the area of operating technology/stocks and manage investments with foresight
- You implement and adapt preventive maintenance processes to ensure the reliability of the systems and prevent recurring failures
- You ensure compliance with safety and quality standards and ensure sustainable energy and environmental management

Your profile

- Degree in Chemical, Mechanical, Industrial, Pharmaceutical Engineering, or a related field
- Extensive experience in asset lifecycle management within Pharma or a similar regulated industry
- Proven background in Engineering or Project Management roles
- Expertise in GMP manufacturing and both GMP and non-GMP utilities would be an advantage
- Strong understanding of asset lifecycle data analytics, statistics, and methods
- Experience with enterprise tools like SAP PM for executing asset lifecycle strategies
- Excellent communication and conflict management skills, able to influence technical and non-technical stakeholders at all levels
- Fluent in English; German is a plus

Your motivation

Are you looking for new challenges in a highly competitive environment? And you want to tackle them creatively and on your own responsibility? Do you prefer a "get-it-done" culture and think in terms of solutions rather than problems? What are you waiting for? We would be happy to explain our corporate benefits in a personal conversation!
